

## Fillingstation ø100 PRO with DAM2000+

Art. No. 110888A

## Technical Data

Consists of:	DANA api MATIC 2000+ Turntable ø 100 cm Side plates and jar storage space Manual lidfitter Lid dispenser
Filling capacity:	10g - ∞ g (honey)
Pump capacity:	ca. 610 kg/hour
Amount of programs:	20 + programs
Power supply:	90-305VAC 50/60Hz
Power consumption:	959 W
Sound level:	Sound pressure level of the pump is <70 dB(A)
Length:	200cm
Item#:	110888A
Tarif Code:	8422 3000

## Semi-automatic filling station

Our filling station PRO is an easy end-to-end solution consisting of our new and improved DANA api MATIC 2000+ with turntable, manual lidfitter and a lid dispenser. It was developed to allow for an ideal workflow in order to avoid unnecessary steps and movements and to provide enough space for your packaging.

The novel design allows for the filling station to be adapted to different glass heights continuously. It comes on lockable wheels, which makes it easy to move the station around and transport it.

With this station you will be able to fill up to 400kg/880LB of honey per hour into containers starting from 10g/0,5oz. The filling precision is +/-1g.

The extra side surfaces makes it possible for a big amount of glasses to be placed for filling at the same time. This means that, as required, one or two employees can easily and efficiently carry out the entire filling and lidfitting process. Additionally, the practical storage boards make it possible to store the filled and empty glasses directly at the station, making the filling process even faster and easier.

This fillingstation comes with an integrated lid-dispenser and lidfitter so you only need to label your product (We also offer labelling machines). At the Apimondia trade fair in Ljubljana, the Swienty lidfitter was awarded a silver medal for its technical innovation. It is very easy to use. You take a filled glass, put the lid on. The handle is pressed down and the lid is screwed onto the glass. The torque can be set between 0-10 nm.

The lid dispenser is placed close at hand to make the work process as convenient and efficient as possible.
