

Labelling dispenser

LABELLING DISPENSER

Dispenses self-adhesive labels from a roll, and feeds them out so that they are ready to be taken off and put on the jar.

The machine will increase the productivity of the small filling operations due to a better workflow. Further, the presentation of your jars will be more unique, since all labels will be placed on the same height on the jar. The machine works also with hex-jars!

Scan the QR code with your phone or tablet and watch 110868 compete against manual hand labeling.

The labelling machine is produced of 2mm stainless steel, with curved edges that ensures incredibly good stability.

Technical Data

Length:	27 cm
Width:	57 cm
Height:	11.5 cm
Weight:	5 kg
Item:	110868
Tarif code:	8436 9900
Packaging:	1 pcs
Max. Diameter for a roll of labels:	200 mm
Max. Label height:	75 mm
Min. diameter of the center of the label roll:	15 mm
Max. Height from the bottom to top label:	28 mm
Min. Height from the bottom to bottom label:	2 mm
